Woodmen Road Expressway Construction UPDATE Paving Operations May 9, 2008 through May 16, 2008 and Girder Placement May 21, 2008 through May 22, 2008

Friday, May 9, 2008

COLORADO SPRINGS, Colo. – Paving operations will start Friday May 9, 2008 and will continue through Friday May 16, 2008 between US Highway 24 and Meridian Road. Drivers are asked to be alert and exercise caution in this area.

Starting on Wednesday May 21, 2008 through Thursday May 22, 2008, drivers on Woodmen Road may experience intermittent delays as girder placement begins on the Westbound Sand Creek bridge just west of Marksheffel Road. Drivers are asked to be alert and exercise caution in this area. Flaggers will be onsite to help direct traffic.

Speed Reductions in the Project Area: Woodmen Road has been reduced from 55 to 40 miles per hour from Black Forest Road to Meridian Road for the duration of the project (April 2009). These speed reductions are established in the best interest of safety for both the traveling public and project workers.

Check the 7-Day Outlook on the Woodmen Road Expressway project Web site www.woodmenroadexpressway.com for new information.

All impacts are subject to change and conditional upon resources and weather.
